# IKO CORDON BUTYL 10.0

## ET00561

### Description:

Extruded butyl sealing cord based on synthetic rubber, suitable for sealing and expansion joints, and applicable between 5°C and 40°C. Sanded to prevent sticking and to improve workability. To be applied in the joint opening. This product is sensitive to solvents. Compatibility with the substrate and usage conditions must be checked in advance.

### Installation

Loose-laid, always in combination with Exceljoint strips (see details in the Avis Technique ATec 5.2_17-2550_V2).

### Composition

| | |
|---|---|
| Component | Synthetic rubber |
| Colour | Black |

### Technical characteristics:

| | |
|---|---|
| Drie substance | ≥ 99 |

### Sizing and palletization:

| | |
|---|---|
| Packaging | 10 ml |
| Rubber string | 10 ml |
| Max storage (months) | 12 |

Store in a place protected from frost and heat.

**Always use a suitable pallet hoisting hook for vertical transport.**
